Abby

We found a problem with a submittal that was made on September 26, 2016 (EPA eSIP Name: Submission Title: CO_2015 Revised 8-Hour Ozone NAAQS_09262016). There is a problem with the document 04-TSD of the PDF Portfolio. There are images that are not viewable, specifically Figures 1-20 through 1-27.

We have been able to determine that this is a compatibility problem with versions of the Adobe software that CDPHE has. Because one software version was older than the other the images didn't come across. Therefore, when it was compiled into the PDF portfolio and sent via the CDX system, EPA received a version where the images could not be seen.

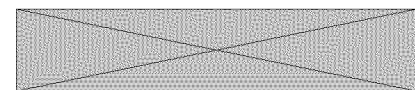

We are rectifying this software version problem and would like to provide EPA with a PDF document that has all images viewable (attached) as I know this TSD is available on EPA's website and available to the public. I apologize for any inconvenience this may cause.

Please let me know if I need to re-insert the correct version through the CDX system or if this is acceptable.

Thank you.

Theresa
